3P-X-DIAG-X-L Diagnostic Experience Kit

www.3rdPlatform.com
sales@3rdplatform.com

The 3rd Platform ***Diagnostic Experience*** provides an instant out-of-the-box solution to rapidly gain knowledge of on-board diagnostic information of vehicles.

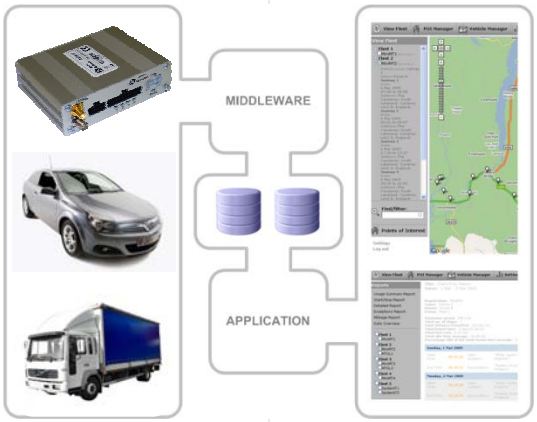
This ***accelerates*** the investigation and research into vehicle usage patterns and fuel economy.

3rd Platform Vehicle Diagnostic single node Experience for HGV or LCV kit:

3P-X-DIAG-1-L (HGV)
3p-X-DIAG-2-L (LCV/cars)

Allow for rapid evaluation and deployment of a professional, complete, end-to-end GPRS enabled solution with the ability to report elements of **CAN/OBD** information over an included modem link to a web based application. This includes full visualisation and reports download for a period of 6 months, that can be extended or additional nodes added.

Assists in the understanding of the true cost of running your vehicle fleet, helps identify where changes can be made to **driver behaviour** or **patterns of work** and thus provide real return on investment (ROI) benefits such as **fuel and maintenance savings**.



- Ready to work “out-of-the-box”
- Complete end-to-end professional system
- SIM included
- Most vehicle types covered
- HGV and LCV (including cars) versions
- All cables, connectors and antenna supplied
- Individual web portal with username/password
- Includes web based mapping/tracking and downloadable reports
- Expandable
- Support and install assist available

3P-X-DIAG-X-L Diagnostic Experience Kit

www.3rdPlatform.com
sales@3rdplatform.com

Kits are supplied with an SLA (service level agreement) and terms and conditions sign-up required at activation via a web page, these cover fair usage on the Cellular Network SIM, support and web application access.

Included with the kit is a prepaid 6 months contract SIM – the contract can be extended beyond this period, if required, subject to an additional airtime contract being signed.

Two kits are available, one targeted at HGV (J1939/FMS) and the other for light commercial vehicles (including cars) E-ODB/J1979. Vehicle cables, connectors and fixings are included, plus installation instructions along with support if required. Dependant on vehicle type the unit will self scan and configure, although there may be a need for assistance with some vehicles to ensure that the right data is collected (included in kit pricing).

*For more information, please contact **sales@3rdplatform.com***

Accessory parts:
